

UltraH₂O by OrboTech

UltraH₂O is a concept for the future. You will clean surfaces easier and faster, compared to traditional methods. And that completely without chemicals. UltraH₂O is effectively used in interior cleaning in sectors such as: health care, social care, schools, kindergardens, hotels, restaurant, sport facilities, public transports etc.

Description

UltraH₂O is produced by deionization and filtering ordinary tap water.

Cold tap water flows through a modified canister which contains a special filtering mass. The filter alters the waters properties to UltraH₂O: A water seeking to obtain it is original balance by dissolving and absorbing dirt.

The water filtration is performed in real time with a continuous flow of $UltraH_2O$, the method requires no additives or electricity. Measurements are done to ensure the quality of $UltraH_2O$.

Benefit

- Less costs.
- Reduced use of chemicals.
- Reduced allergy problems.
- Better cleaning results and less resoiling.
- Simplified cleaning routines and instructions.
- Reduced stockholding, transports and waste.

Properties

- pH-neutral
- Odourless
- ✓ Effective
- Universal

Use

UltraH₂O is used when cleaning surfaces like walls, benches, tables, glas, windows, tiles, sanitary ware, stainless etc.

Connect tap water outlet to the UltraH₂O filter.

The water gets deionized and 100% free from particles.

Instructions

 $UltraH_2O$ is applied on the surface. Next, wipe with a microfibre cloth or mop of high quality.

Begin the cleaning of any interior surface.

UltraH₂O disolves and absorbs the dirt.

Specifications UltraH₂O filter system Standard & Mini

Material, shell

Glasfiber reinforced Polypropylene

Material, tap

Polyethylene, food graded, HDPE

Certificate

Fulfills NSF 44

Filter

Mixed Bed, DI-granulat

Measurments

20 x 20 x 92 / 16 x 16 x 52 cm

Volume

25 liter / 7 liter

Pressure

10,5 bar

Max pressure

42 bar

Min. temperature

1°C

Mini (7 I)

Standard (25 I)
